Important Conditions of Your Purchase

The Property may have been acquired by the Seller through foreclosure, deed in lieu of foreclosure, trustee's sale or similar action. The Seller has never occupied the Property and has little or no direct knowledge about the condition of the Property or any defects. Therefore, neither the Seller nor Altisource or its subsidiaries will provide any disclosures or warranties to you relating to the Property's condition or status except where required by applicable law. The Property is sold "AS IS".

Please note that the Agreement may contain contingencies to the closing. The Seller expects you to adhere to all contingency deadlines set forth in the Agreement, as well as to close the transaction on or before the contractual closing date. We can offer you no assurances that Seller will agree to any requested extension of the contingency or closing date. When all applicable contingency periods have expired, the Earnest Money will become non-refundable.

If any of the Property's utilities are not currently activated and you require them for any inspection, it will be your responsibility to activate them at your expense. In addition, if the Property is part of a condominium association, home owners association or similar community governing scheme, it is your responsibility to obtain, review and approve any governing documents relating to the Property, unless otherwise required by state law.

The Agreement must be fully signed and initialed by you and signed by your broker (if any), then returned to the Seller within forty-eight (48) hours. Please be sure that the Earnest Money funds reference the Sellers's name and Property address. No changes or negotiation to the Agreement will be accepted. *The executed documents will be transmitted automatically if executed in Docusign*.

Until the Seller receives the Agreement, executed by you, and signs and returns to you a copy of the fully executed Agreement, there will be no binding contract between the parties, and the Seller will have no obligation to move forward with the contemplated sale. Therefore, until this happens, the Seller will continue to market the Property, negotiate and accept other offers on the Property. Further, at all times, even after there is a binding contract, the Seller reserves the right to continue to market the Property and accept backup offers on the Property.

If you, a the Buyer refuses or fails to complete the transaction for ANY reason (including, but not limited to, remitting the deposit or total purchase amount), you relinquish ANY right to complete the transaction and shall have no rights or interest in the property, as well as forfeit all deposit monies as liquidated damages to the Seller. **PLEASE BE ADVISED:** Various state statutes give the Seller the right to pursue legal action against bidders who refuse to complete transactions. This may include (but is not limited to) suit to compel completion of the sale, and/or criminal charges for fraud or other intentional acts.

To complete the transaction, you must deliver the Earnest Money funds (wire, certified check or money order) to the Closing Agent within forty-eight (48) hours after you receive the fully executed copy of the Agreement, along with a copy of the fully executed Agreement and your lender's contact information (if any). If we don't receive confirmation of the Closing Agent's receipt of the Earnest Money by that deadline, Seller reserves the right to terminate the Agreement and pursue default remedies.

PURCHASE AND SALE AGREEMENT

This Purchase and Sale Agreement (this "Agreement"), is made by and between Seller and Buyer, both as defined in *Section 2* below (together, the "Parties" and each individually, a "Party"), and is dated the date this Agreement is executed by the Seller, as indicated below on Seller's signature block (the "Effective Date").

In consideration of the mutual benefits accruing to the Parties hereto and other valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Seller and Buyer hereby agree as follows:

1 **BUYER ACKNOWLEDGMENTS**.

Buyer acknowledges and agrees to the following:

- 1.1. Not Binding Until Signed by Seller. This Agreement has been prepared in response to Buyer's expressed interest to purchase the Property (as defined in Section 2.7), upon the terms and conditions contained herein. The submission of this Agreement to Buyer does not create a binding obligation on the part of the Seller. This Agreement does not constitute an offer by Seller to sell the Property to Buyer, and thus Buyer's signature on this Agreement does not constitute an acceptance of any offer. Instead, Buyer's delivery of this Agreement to Seller, signed and initialed by Buyer, constitutes only Buyer's offer to purchase the Property upon the terms and conditions contained herein. This Agreement shall not be binding on Seller and there shall be no contract between the Parties unless and until Seller accepts Buyer's offer to purchase the Property, as evidenced by Seller's execution of this Agreement and subsequent delivery of the executed Agreement to Buyer.
- 1.2. Offer to be Delivered Electronically. Within forty-eight (48) hours of Buyer's receipt of this Agreement, Buyer shall deliver to Seller this Agreement and all related documents, executed and initialed by Buyer and executed by Selling Broker, if any. These documents shall be sent to Seller electronically via the DocuSign execution and upload process.
- 1.3. Other Offer, Backup Offers. Seller reserves the right to continue to offer the Property for sale to others after Buyer's delivery of this Agreement and/or Seller's acceptance of Buyer's offer and accept backup offers at Seller's sole and absolute discretion.
- 1.4. Offer Expiration Deadline. Buyer's offer shall expire on the Offer Expiration Date (as defined in Section 2.10) at 5:00 PM ET, unless accepted by Seller pursuant to the provisions of Section 1.1 hereof. If this Agreement is not executed by Seller on or prior to the Offer Expiration Date, this Agreement shall be deemed to have been rejected and cancelled and neither party shall have any further rights, obligations, or liability to or against the other hereunder. Seller has the right, without incurring any liability, to reject this Agreement without cause or explanation to Buyer.
- 1.5. Buyer's Option to Select Title Provider and Closing Agent. Buyer acknowledges that it is Buyer's responsibility for selecting both the closing agent and it's choice of title insurance company licensed in the state where the Property is located to provide Buyer with its title insurance policy(ies) ("Buyer Title Provider"). Buyer shall be responsible for the cost of Buyer's title insurance policies and all related search fees and all of the escrow and closing fees charged by the Buyer selected closing agent, without any contribution from Seller. Buyer's decision regarding selection of the Buyer Title Provider and the selected closing agent is shown in Sections 2.3 and 2.4 hereof (and the selected title provided shall be hereinafter referred to as the, "Title Provider" and the selected closing agent shall be hereinafter referred to as the "Closing Agent").
- 1.6. No-Employment Relationship. Neither Buyer nor any of its Family Members are employees of Seller, the Closing Agent, the Listing Broker or any of their Affiliates. Should Seller, the Closing Agent, the Listing Broker or any of their Affiliates determine that Buyer or any of its Family Members are employees of Seller, the Closing Agent, the Listing Broker or any of their Affiliates, the Agreement shall automatically be null and void and of no force of effect, without further recourse to Buyer, and Seller, the Closing Agent, the Listing Broker or any of their Affiliates shall be released from further liability thereunder. For the purposes of this Agreement "Affiliate" shall mean any entity that, directly or indirectly through one or more intermediary,

6. NO MORTGAGE COMMITMENT CONTINGENCY.

6.1. Sale Not Contingent on Mortgage Commitment or Financing. This Agreement is not subject to receipt of a mortgage commitment or any financing contingency. Buyer understands and agrees that Buyer's obligations under this Agreement are not conditioned upon: (a) Buyer's application for a mortgage loan; (b) Buyer's delivery of a commitment for a mortgage loan from any lender; (c) Buyer's acceptance of such a commitment or (d) buyer securing financing for the Purchase Price (or any portion thereof) or the Total Due from Buyer. Buyer represents to Seller that Buyer has sufficient Readily Available Funds pursuant to Section 9.8.3 to complete the purchase of the Property. If Buyer is unable to submit Readily Available Funds at the time of the Closing Date to Seller, then Seller shall be entitled to exercise all remedies available to Seller pursuant to Section 12.1.

7. NO INSPECTION CONTINGENCY.

- 7.1. <u>Sale Not Contingent on Property Inspection</u>. This Agreement is not subject to a property inspection contingency. Buyer represents and warrants to Seller that Buyer is fully aware of the physical condition and state of repair of the Property and that:
 - (a) Prior to execution of this Agreement, Buyer has had sufficient time and access to the Property to examine the condition of the Property and its surrounding area, the title of the Property, any Community Documents governing the Property pursuant to *Section 13.3.3*, the occupancy status of the Property and any other matter which may affect Buyer's decision to execute this Agreement, including but not limited to those matters listed in *Section 13*; and

Buyer hereby waives the opportunity to conduct any additional examinations of the Property.

8. **TITLE**.

8.1. <u>Transfer of Title</u>. Insurable title shall be delivered to Buyer by deed on a form acceptable to Seller at Seller's sole and absolute discretion. The deed to be delivered by Seller at Closing shall be a deed that covenants that grantor grants only that title which grantor may have and that grantor will only defend title against persons claiming by, through or under the grantor, but not otherwise. 8.3.	Title 1	Defe	cts

CWCOT PSA SID899 Buyer's Initials: Mk / Pag	Page 6

- 8.3.1. Notice of Defects. Buyer shall have five (5) days from the date of Buyer's receipt of the Title Binder or Title Opinion to examine title and raise any title objections which, if valid, would make title to the Property uninsurable. Buyer's objections must be made in writing and delivered to Seller by 5:00 pm ET on the last day of the aforementioned five (5) day period, TIME BEING OF THE ESSENCE, or Buyer's objections shall be deemed waived.
- 8.3.2. Seller's Response, Buyer's Options. If Buyer raises any title objection, Seller shall have the right to extend the Closing Date pursuant to Section 9.5.1 to resolve such title objections or terminate this Agreement. If Seller cures the title objection and is able to deliver insurable title, then the Parties shall proceed to Closing within three (3) business days of Seller's resolution of the title objection. If, on the other hand, Seller determines that Seller is unable or unwilling, at Seller's sole discretion, to make the title insurable or to obtain an Owner's Policy subject only to the rights of tenants or other parties in possession of the Property, if any, and standard exceptions in the jurisdiction in which the Property is located, Buyer may elect to: (a) take title to the Property in its then current condition without any abatement of the Purchase Price and without any liability on the part of Seller, thereby waiving any title objections, and the Parties shall proceed to Closing on the Closing Date, or within three (3) business days thereafter; or (b) terminate this Agreement and receive a refund of the Deposit pursuant to Section 5.4. Buyer's options contained in the previous sentence shall be Buyer's sole and exclusive remedies at law or in equity against Seller for Seller's inability or unwillingness to deliver insurable title to the Property.
- 8.3.3. No Obligation to Cure Defects. Seller shall be under no obligation to: (a) remove any exception or cure any alleged title defect; (b) bring any action or proceeding or bear any expense in order to enable Seller to convey insurable title to the Property in accordance with this Agreement, or (c) otherwise make the title to the Property insurable. Any attempt by the Seller to remove such title exceptions shall not impose an obligation upon the Seller to remove those exceptions.
- 8.3.4. <u>Buyer's Acknowledgment of Potential Foreclosure Rights</u>. Buyer acknowledges that Seller's title to the Property may be subject to court approval of foreclosure, expiration of bid periods or a mortgagor's right of redemption and Seller shall have the right to unilaterally extend the Closing Date pursuant to *Section 9.5.1* if necessary.
- 9. **CLOSING**.
- 9.1. TIME OF THE ESSENCE. IT IS AGREED THAT TIME IS OF THE ESSENCE WITH RESPECT TO ALL DATES SPECIFIED IN THIS AGREEMENT AND ANY ADDENDA, EXHIBITS, RIDERS OR AMENDMENTS HERETO. THIS MEANS THAT ALL DEADLINES ARE INTENDED TO BE STRICT AND ABSOLUTE.
- 9.2. <u>Selection of Closing Agent</u>. The Closing Agent has been selected by the Party designated in *Section* 2.3 in accordance with *Section* 1.5.
- 9.3. <u>Buyer's Legal Representation</u>. Buyer is entitled to legal representation at or before Closing and may elect to have such representation at Buyer's sole cost and expense.
- 9.4. <u>Closing Date and Location</u>. The transaction contemplated by this Agreement (the "Closing") shall be consummated in escrow through the Closing Agent on or before the Closing Date as defined in *Section 2.21*. If, pursuant to *Section 9.5*, the Closing Date is extended either in writing by a Closing Date Extension Amendment executed by Seller and Buyer or unilaterally extended by Seller, the term "Closing Date" shall refer to the extended Closing Date. The location of the Closing shall be held in the offices of the Closing Agent, or at a place so designated and approved by Seller, unless otherwise required by applicable law.
- 9.5. Extensions of Closing Date. Closing Agent shall conduct the Closing on or before the Closing Date pursuant to *Section 9.4*, subject to each of the following:

		Mk.	
CWCOT PSA SID899	Buyer's Initials:	<u> </u>	Page 7

- 9.5.1. Seller's Unilateral Right to Extend. If, in Seller's sole discretion, Seller is unable to close the transaction contemplated by this Agreement on or before the original Closing Date, then such Closing Date shall be automatically extended for thirty (30) days; provided, however, that Seller, Seller's representatives, Seller's agent or the Closing Agent may give Buyer written notice during such thirty (30) day period that Seller is ready to close and the Closing shall occur within five (5) days following such written notice. Any further extensions must be agreed to in writing by both Buyer and Seller.
- 9.5.2. <u>Seller's Right to Cancel</u>. If Seller is unable or unwilling, at Seller's sole discretion, to deliver insurable title to Buyer at or prior to Closing, as may be extended herein, and Buyer does not elect to waive Buyer's title objection and proceed to Closing pursuant to *Section 8.3.2*, then Closing shall not occur, in which case such inability shall be deemed no fault of Seller, and Seller may cancel this Agreement and the provisions of *Section 8.3.2* shall apply.
- 9.5.3. Buyer-Requested Extensions. If Buyer requests an extension of the Closing Date in writing at least five (5) days prior to the scheduled Closing Date, and Seller, in Seller's sole and absolute discretion, grants in writing, an extension pursuant to a mutually executed Closing Date Extension Amendment, Buyer shall pay Seller, as a condition of Seller's execution of this Amendment, a (1) \$300.00 fee for the extension, and (2) a per diem fee of \$100.00 for each day that the Closing Date is extended, regardless of whether the Closing actually occurs before the Closing Date. Buyer shall send an executed copy of the Closing Date Extension Amendment and a copy of the check for the above-described fees to Seller to the e-mail address or fax number shown in Section 1.2, and shall deliver the signed agreement and the check to the Closing Agent within one (1) business day thereafter. These fees shall be considered as an additional "hard money" deposit, and therefore part of the Deposit pursuant to Section 5.1.
- 9.6. <u>Conditions Precedent</u>. The occurrence of the Closing is subject to each of the following conditions precedent (the failure of any of which shall not, in and of itself, relieve any Party of its obligations set forth elsewhere in this Agreement):
 - (a) Seller shall have delivered the Seller's Deliverables set forth in *Section 9.8.1*;
 - (b) Buyer shall have delivered the Buyer's Deliverables set forth in *Section 9.8.2*;
 - (c) Seller shall not have given written notice to Closing Agent that Buyer is in default of this Agreement; and
 - (d) The Title Provider shall have irrevocably committed to issue to Buyer the Owner's Policy covering the Property showing coverage in the amount of the Purchase Price and showing insurable title to the Property.
- 9.7. <u>Escrow Instructions</u>. Neither party shall be required to be present at the Closing, unless otherwise required by applicable law or agreed to by the parties. Seller and Buyer agree to cause all documents and deliverables required to be delivered by the parties hereunder and by any necessary third parties, including by not limited to the those deliverables required pursuant to Section 9.8 hereof, to be delivered to Closing Agent prior to the Closing Date, and Closing Agent shall disburse the documents and funds on the Closing Date in accordance with the requirements of this Agreement or any further closing escrow instructions agreed to in writing by Seller, Buyer and Closing Agent.

 - (b) An executed Settlement Statement; and
 - (c) Any and all other instruments required by Lender, Title Provider, Closing Agent or otherwise to consummate Buyer's purchase of the Property.
- 9.8.3. Readily Available Funds. Buyer shall deliver, or cause to be delivered, all funds necessary to close hereunder as shown on the Settlement Statement, including all funds due Seller from the sale in the form of Readily Available Funds. "Readily Available Funds" shall mean funds delivered to the account of the Closing Agent in the manner designated by the Closing Agent and available for disbursement to Seller and other third parties, as applicable. Thinking About Buying a Home?

Get An EnergyGauge® Rating!

Congratulations on your decision to purchase a home.

As you know, there are a lot of factors to consider before signing on the dotted line. By now, you've probably checked out the location of the home you like the best. You know how much the seller wants, how many bedrooms there are, whether your dining room table will fit, where you'll park your car and lots of other important things.

But wait, there's still one more important thing you really ought to do.

You wouldn't buy a car without asking how many miles-per-gallon it gets, would you? So why would you even think of buying a house without knowing how much the power bills will be? That's why now is the perfect time to get an EnergyGauge® rating on the house.

Since 1994, there has been a voluntary, statewide energy-efficiency rating system for homes in Florida. Prospective homeowners just like you, all around the state, are getting their homes rated before they make their purchase.

There are several very important reasons why:

- ▲ Energy ratings give homebuyers a market-place yardstick that measures the benefits of energy-efficiency improvements. You get detailed estimates of how much your energy use will cost.
- ▲ Energy ratings give you clear and specific information that lets you compare similar homes on their energy use. Two homes might look similar, but one may be efficient and comfortable, and the other an energy-guzzler with a very uncomfortable interior.
- ▲ Maybe most important of all, the national Home Energy Rating System (HERS) Index on the energy rating can

Consider the Benefits:

- More Home for Less Money
- ▲ Tested Quality Construction
- ▲ Enhanced Indoor Comfort
- ▲ Superior Energy Efficiency
- ▲ More Environmental Sustainability
- ▲ Improved Mortgage Options
- ▲ Greater Resale Value

qualify you for a number of special mortgage programs that offer lower interest rates, lower closing costs, and other benefits. More and more lenders are coming into Florida with money-saving packages for buyers of energy-efficient homes

Before buying your next home, hire a Certified Energy Rater to do a rating.

Your builder or Realtor can help you find a Certified Rater in your area. After the rating, you'll get an easy-to-understand Energy Guide that estimates how much it will cost to pay for energy used in that home; it will allow you to look at a number of separate areas of energy use throughout the house.

For many years, buyers have had home inspectors look over a home before making their purchase. This is a great way to find out about potential house problems before you make your purchase. Smart homebuyers around the country are now also asking for a home energy rating to look specifically at the energy-users in a home and determine their efficiency. Because energy costs can often equal house payments, the relatively small cost of a home energy rating can easily be offset by many years of lower energy payments.

You're already familiar with the miles-per-gallon stickers on new automobiles, and the yellow Energy Guide labels on home appliances. Shoppers use this information to figure out how much that car or appliance is really going to cost them. This information gives the buyer

a good estimate of what it will cost to operate that car or use that appliance, over and above the purchase price. A car or product that is cheaper to buy can often be more expensive to operate, so this information can be very important to assure that you make the best purchase decision.

decision. Here's how the Florida EnergyGauge* program works.

After the rating, you'll get an easyto read form like the one on the next page. The Rating Guide has a scale that allows you to compare the specific home you're looking at with the most efficient and the least efficient homes of the same size, with the same number of bedrooms available in your part of the state today. In addition to this overall estimate of energy use and comparisons, you get a detailed breakdown on the energy costs of the home's air conditioning, space heating, water heating, refrigerator, clothes dryer, cooking costs, lighting, pool pumping and other miscellaneous equipment.

One of the keys to the success of this program is the uniformity of ratings, made possible by the use of the EnergyGauge® software developed by the Florida Solar Energy Center®. It has been specially designed to let Raters input the key data on the home and obtain accurate information for comparison purposes. A unique optimization feature even lets Raters determine what energy-efficiency features can be added to the home to maximize cost-savings and comfort-improvement.

So how can a home energy rating help you reduce your energy use and save money?

That's easy. While the design and con-struction of your home, and the efficiency of its appliances and equipment, control the most significant

portion of its energy use, occupant lifestyle will still have a big effect on exactly how much energy gets used. Your comfort preferences and personal habits - the level at which you set the thermostat, whether or not you turn off lights and fans when leaving a room, how much natural ventilation you use, and other factors - will all affect your home's actual monthly energy use.

Florida's program parallels national activities.

The Residential Energy Services
Network (RESNET) sets the national
standards for Home Energy Rating
System (HERS), and Florida's system
meets these standards. The Florida
Building Energy Rating Guide provides
a HERS Index for the home. This
national score enables homes to qualify
for national mortgage financing options
requiring a HERS Index. This index is
computed in accordance with national
guidelines, considering the heating,
cooling, water heating, lighting, appliance, and photovoltaic energy uses.
HERS awards stars to the rating.

Tell your Realtor or builder that you want to get the home rated before you buy it.

They can give you the names of Raters in your area. Additional information on the program is available from the Energy Gauge Program Office at 321-638-1715, or visit our Web site at www.floridaenergycenter.org.

Who does Energy Ratings?

It is important to note that only Florida State Certified Raters are allowed to perform ratings. These Raters have undergone rigorous training programs and have passed the RESNET National Core exam and the required challenge exams. They are also required to undergo continuing education classes and additional exams to keep

Energy Ratings in Florida

The Florida Building Energy-Efficiency Rating Act (Florida Statute 553.990) was passed by the State Legislature in 1993 and amended in 1994. It established a voluntary statewide energy-efficiency rating system for homes. The Rating System has been adopted by DCA Rule 98-60.

IMPORTANT!

Lead From Paint, Dust, and Soil in and Around Your Home Can Be Dangerous if Not Managed Properly

- Children under 6 years old are most at risk for lead poisoning in your home.
- Lead exposure can harm young children and babies even before they are born.
- Homes, schools, and child care facilities built before 1978 are likely to contain lead-based paint.
- Even children who seem healthy may have dangerous levels of lead in their bodies.
- Disturbing surfaces with lead-based paint or removing lead-based paint improperly can increase the danger to your family.
- People can get lead into their bodies by breathing or swallowing lead dust, or by eating soil or paint chips containing lead.
- People have many options for reducing lead hazards. Generally, lead-based paint that is in good condition is not a hazard (see page 10).

Protect Your **Family From Lead** in Your Home

United States Department of Housing and Urban Development

Are You Planning to Buy or Rent a Home Built Before 1978?

Did you know that many homes built before 1978 have **lead-based** paint? Lead from paint, chips, and dust can pose serious health hazards.

Read this entire brochure to learn:

- · How lead gets into the body
- · About health effects of lead
- What you can do to protect your family
- Where to go for more information

Before renting or buying a pre-1978 home or apartment, federal law requires:

- Sellers must disclose known information on lead-based paint or lead-based paint hazards before selling a house.
- Real estate sales contracts must include a specific warning statement about lead-based paint. Buyers have up to 10 days to check for lead.
- Landlords must disclose known information on lead-based paint and lead-based paint hazards before leases take effect. Leases must include a specific warning statement about lead-based paint.

If undertaking renovations, repairs, or painting (RRP) projects in your pre-1978 home or apartment:

• Read EPA's pamphlet, *The Lead-Safe Certified Guide to Renovate Right*, to learn about the lead-safe work practices that contractors are required to follow when working in your home (see page 12).

Simple Steps to Protect Your Family from Lead Hazards

If you think your home has lead-based paint:

- Don't try to remove lead-based paint yourself.
- Always keep painted surfaces in good condition to minimize deterioration.
- Get your home checked for lead hazards. Find a certified inspector or risk assessor at epa.gov/lead.
- Talk to your landlord about fixing surfaces with peeling or chipping paint.
- Regularly clean floors, window sills, and other surfaces.
- Take precautions to avoid exposure to lead dust when remodeling.
- When renovating, repairing, or painting, hire only EPA- or state-approved Lead-Safe certified renovation firms.
- Before buying, renting, or renovating your home, have it checked for lead-based paint.
- Consult your health care provider about testing your children for lead. Your pediatrician can check for lead with a simple blood test.
- Wash children's hands, bottles, pacifiers, and toys often.
- Make sure children avoid fatty (or high fat) foods and eat nutritious meals high in iron and calcium.
- Remove shoes or wipe soil off shoes before entering your house.

Lead Gets into the Body in Many Ways

Adults and children can get lead into their bodies if they:

- Breathe in lead dust (especially during activities such as renovations, repairs, or painting that disturb painted surfaces).
- Swallow lead dust that has settled on food, food preparation surfaces, and other places.
- Eat paint chips or soil that contains lead.

Lead is especially dangerous to children under the age of 6.

- At this age, children's brains and nervous systems are more sensitive to the damaging effects of lead.
- Children's growing bodies absorb more lead.
- Babies and young children often put their hands and other objects in their mouths. These objects can have lead dust on them.

Women of childbearing age should know that lead is dangerous to a developing fetus.

 Women with a high lead level in their system before or during pregnancy risk exposing the fetus to lead through the placenta during fetal development.

Health Effects of Lead

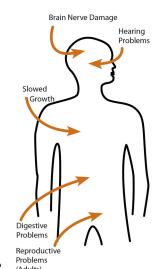

Lead affects the body in many ways. It is important to know that even exposure to low levels of lead can severely harm children.

In children, exposure to lead can cause:

- Nervous system and kidney damage
- Learning disabilities, attention deficit disorder, and decreased intelligence
- Speech, language, and behavior problems
- Poor muscle coordination
- · Decreased muscle and bone growth
- Hearing damage

While low-lead exposure is most common, exposure to high amounts of lead can have devastating effects on children, including seizures, unconsciousness, and, in some cases, death.

eizures, unconsciousness, and, in some cases, death.

3

Although children are especially susceptible to lead exposure, lead can be dangerous for adults, too.

In adults, exposure to lead can cause:

- Harm to a developing fetus
- Increased chance of high blood pressure during pregnancy
- Fertility problems (in men and women)
- High blood pressure
- Digestive problems
- Nerve disorders
- Memory and concentration problems
- Muscle and joint pain

Check Your Family for Lead

Get your children and home tested if you think your home has lead.

Children's blood lead levels tend to increase rapidly from 6 to 12 months of age, and tend to peak at 18 to 24 months of age.

Consult your doctor for advice on testing your children. A simple blood test can detect lead. Blood lead tests are usually recommended for:

- Children at ages 1 and 2
- Children or other family members who have been exposed to high levels of lead
- Children who should be tested under your state or local health screening plan

Your doctor can explain what the test results mean and if more testing will be needed.

Other Sources of Lead

While paint, dust, and soil are the most common sources of lead, other lead sources also exist:

- **Drinking water.** Your home might have plumbing with lead or lead solder. You cannot see, smell, or taste lead, and boiling your water will not get rid of lead. If you think your plumbing might contain lead:
 - Use only cold water for drinking and cooking.
 - Run water for 15 to 30 seconds before drinking it, especially if you have not used your water for a few hours.

Call your local health department or water supplier to find out about testing your water, or visit epa.gov/lead for EPA's lead in drinking water information.

- Lead smelters or other industries that release lead into the air.
- Your job. If you work with lead, you could bring it home on your body or clothes. Shower and change clothes before coming home. Launder your work clothes separately from the rest of your family's clothes.
- Hobbies that use lead, such as making pottery or stained glass, or refinishing furniture. Call your local health department for information about hobbies that may use lead.
- Old toys and furniture may have been painted with lead-containing paint. Older toys and other children's products may have parts that contain lead.⁴
- Food and liquids cooked or stored in lead crystal or lead-glazed pottery or porcelain may contain lead.
- Folk remedies, such as "greta" and "azarcon," used to treat an upset stomach.

⁴ In 1978, the federal government banned toys, other children's products, and furniture with lead-containing paint (16 CFR 1303). In 2008, the federal government banned lead in most children's products. The federal government currently bans lead in excess of 100 ppm by weight in most children's products (76 FR 44463).

Renovating, Remodeling, or Repairing (RRP) a Home with Lead-Based Paint

If you hire a contractor to conduct renovation, repair, or painting (RRP) projects in your pre-1978 home or childcare facility (such as pre-school and kindergarten), your contractor must:

- Be a Lead-Safe Certified firm approved by EPA or an EPA-authorized state program
- Use qualified trained individuals (Lead-Safe Certified renovators) who follow specific lead-safe work practices to prevent lead contamination
- Provide a copy of EPA's lead hazard information document, The Lead-Safe Certified Guide to Renovate Right

RRP contractors working in pre-1978 homes and childcare facilities must follow lead-safe work practices that:

- Contain the work area. The area must be contained so that dust and debris do not escape from the work area. Warning signs must be put up, and plastic or other impermeable material and tape must be used.
- Avoid renovation methods that generate large amounts of lead-contaminated dust. Some methods generate so much leadcontaminated dust that their use is prohibited. They are:
 - Open-flame burning or torching
 - Sanding, grinding, planing, needle gunning, or blasting with power tools and equipment not equipped with a shroud and HEPA vacuum attachment and
 - Using a heat gun at temperatures greater than 1100°F
- Clean up thoroughly. The work area should be cleaned up daily. When all the work is done, the area must be cleaned up using special cleaning methods.
- **Dispose of waste properly.** Collect and seal waste in a heavy duty bag or sheeting. When transported, ensure that waste is contained to prevent release of dust and debris.

To learn more about EPA's requirements for RRP projects visit epa.gov/getleadsafe, or read *The Lead-Safe Certified Guide to Renovate Right*.

Where Lead-Based Paint Is Found

In general, the older your home or childcare facility, the more likely it has lead-based paint.¹

Many homes, including private, federally-assisted, federally-owned housing, and childcare facilities built before 1978 have lead-based paint. In 1978, the federal government banned consumer uses of lead-containing paint.²

Learn how to determine if paint is lead-based paint on page 7.

Lead can be found:

- In homes and childcare facilities in the city, country, or suburbs,
- In private and public single-family homes and apartments,
- · On surfaces inside and outside of the house, and
- In soil around a home. (Soil can pick up lead from exterior paint or other sources, such as past use of leaded gas in cars.)

Learn more about where lead is found at epa.gov/lead.

5

¹ "Lead-based paint" is currently defined by the federal government as paint with lead levels greater than or equal to 1.0 milligram per square centimeter (mg/cm), or more than 0.5% by weight.

² "Lead-containing paint" is currently defined by the federal government as lead in new dried paint in excess of 90 parts per million (ppm) by weight.

Identifying Lead-Based Paint and Lead-Based Paint Hazards

Deteriorating lead-based paint (peeling, chipping, chalking, cracking, or damaged paint) is a hazard and needs immediate attention. **Lead-based paint** may also be a hazard when found on surfaces that children can chew or that get a lot of wear and tear, such as:

- On windows and window sills

Lead-based paint is usually not a hazard if it is in good condition and if it is not on an impact or friction surface like a window.

Lead dust can form when lead-based paint is scraped, sanded, or heated. Lead dust also forms when painted surfaces containing lead bump or rub together. Lead paint chips and dust can get on surfaces and objects that people touch. Settled lead dust can reenter the air when the home is vacuumed or swept, or when people walk through it. EPA currently defines the following levels of lead in dust as hazardous:

- 40 micrograms per square foot ($\mu g/ft^2$) and higher for floors, including carpeted floors
- 250 µg/ft² and higher for interior window sills

Lead in soil can be a hazard when children play in bare soil or when people bring soil into the house on their shoes. EPA currently defines the following levels of lead in soil as hazardous:

- 400 parts per million (ppm) and higher in play areas of bare soil
- 1,200 ppm (average) and higher in bare soil in the remainder of the yard

Remember, lead from paint chips—which you can see—and lead dust—which you may not be able to see—both can be hazards.

The only way to find out if paint, dust, or soil lead hazards exist is to test for them. The next page describes how to do this.

Reducing Lead Hazards, continued

If your home has had lead abatement work done or if the housing is receiving federal assistance, once the work is completed, dust cleanup activities must be conducted until clearance testing indicates that lead dust levels are below the following levels:

- 40 micrograms per square foot ($\mu g/ft^2$) for floors, including carpeted floors
- 250 μg/ft² for interior windows sills
- 400 µg/ft² for window troughs

For help in locating certified lead abatement professionals in your area, call your state or local agency (see pages 14 and 15), or visit epa.gov/lead, or call 1-800-424-LEAD.

Reducing Lead Hazards

Disturbing lead-based paint or removing lead improperly can increase the hazard to your family by spreading even more lead dust around the house.

 In addition to day-to-day cleaning and good nutrition, you can temporarily reduce lead-based paint hazards by taking actions, such as repairing damaged painted surfaces and planting grass to cover leadcontaminated soil. These actions are not permanent solutions and will need ongoing attention.

- You can minimize exposure to lead when renovating, repairing, or painting by hiring an EPA- or statecertified renovator who is trained in the use of lead-safe work practices. If you are a do-it-yourselfer, learn how to use lead-safe work practices in your home.
- To remove lead hazards permanently, you should hire a certified lead abatement contractor. Abatement (or permanent hazard elimination) methods include removing, sealing, or enclosing lead-based paint with special materials. Just painting over the hazard with regular paint is not permanent control.

Always use a certified contractor who is trained to address lead hazards safely.

- Hire a Lead-Safe Certified firm (see page 12) to perform renovation, repair, or painting (RRP) projects that disturb painted surfaces.
- To correct lead hazards permanently, hire a certified lead abatement professional. This will ensure your contractor knows how to work safely and has the proper equipment to clean up thoroughly.

Certified contractors will employ qualified workers and follow strict safety rules as set by their state or by the federal government.

Checking Your Home for Lead

You can get your home tested for lead in several different ways:

- A lead-based paint inspection tells you if your home has lead-based paint and where it is located. It won't tell you whether your home currently has lead hazards. A trained and certified testing professional, called a lead-based paint inspector, will conduct a paint inspection using methods, such as:
 - Portable x-ray fluorescence (XRF) machine
 - Lab tests of paint samples
- A risk assessment tells you if your home currently has any lead hazards from lead in paint, dust, or soil. It also tells you what actions to take to address any hazards. A trained and certified testing professional, called a risk assessor, will:
 - Sample paint that is deteriorated on doors, windows, floors, stairs, and walls
 - Sample dust near painted surfaces and sample bare soil in the yard
 - · Get lab tests of paint, dust, and soil samples
- A combination inspection and risk assessment tells you if your home has any lead-based paint and if your home has any lead hazards, and where both are located.

Be sure to read the report provided to you after your inspection or risk assessment is completed, and ask questions about anything you do not understand.

Checking Your Home for Lead, continued

In preparing for renovation, repair, or painting work in a pre-1978 home, Lead-Safe Certified renovators (see page 12) may:

- Take paint chip samples to determine if lead-based paint is present in the area planned for renovation and send them to an EPA-recognized lead lab for analysis. In housing receiving federal assistance, the person collecting these samples must be a certified lead-based paint inspector or risk assessor
- Use EPA-recognized tests kits to determine if lead-based paint is absent (but not in housing receiving federal assistance)
- Presume that lead-based paint is present and use lead-safe work practices

There are state and federal programs in place to ensure that testing is done safely, reliably, and effectively. Contact your state or local agency for more information, visit epa.gov/lead, or call **1-800-424-LEAD** (5323) for a list of contacts in your area.³

What You Can Do Now to Protect Your Family

If you suspect that your house has lead-based paint hazards, you can take some immediate steps to reduce your family's risk:

- If you rent, notify your landlord of peeling or chipping paint.
- Keep painted surfaces clean and free of dust. Clean floors, window frames, window sills, and other surfaces weekly. Use a mop or sponge with warm water and a general all-purpose cleaner. (Remember: never mix ammonia and bleach products together because they can form a dangerous gas.)
- Carefully clean up paint chips immediately without creating dust.
- Thoroughly rinse sponges and mop heads often during cleaning of dirty or dusty areas, and again afterward.
- Wash your hands and your children's hands often, especially before they eat and before nap time and bed time.
- Keep play areas clean. Wash bottles, pacifiers, toys, and stuffed animals regularly.
- Keep children from chewing window sills or other painted surfaces, or eating soil.
- When renovating, repairing, or painting, hire only EPA- or stateapproved Lead-Safe Certified renovation firms (see page 12).
- Clean or remove shoes before entering your home to avoid tracking in lead from soil.
- Make sure children avoid fatty (or high fat) foods and eat nutritious meals high in iron and calcium. Children with good diets absorb less lead.
